

SHUBHAM SHAH

Software Engineer • Flutter & React Native • AI-Assisted Development

+91-8200495373 | shubhamshah9097@gmail.com | Bhavnagar, Gujarat, India

linkedin.com/in/shubhamshah2413 | github.com/shahshubham9090 | Open to Relocation, Hybrid & WFH | Immediate Joiner

Software Engineer with 2+ years of experience across Flutter and React Native, shipping 5+ production apps live on Play Store and App Store with zero critical post-launch failures. Strong in Dart, JavaScript/TypeScript, Firebase, and BLoC/Provider/GetX/Redux state management, with hands-on ownership of REST API and WebSocket integration, unit/integration testing (80%+ coverage), and full production-release lifecycle. Uses AI-assisted development (GitHub Copilot, Claude Code, ChatGPT, Cursor AI) to cut debugging time by 30% and speed up delivery by 20%. Thrives in fast-paced, ownership-heavy environments — comfortable taking a feature from requirement to production release and quick to pick up new stacks.

CORE COMPETENCIES

Flutter & React Native • Cross-Platform Architecture (Android, iOS, Web) • BLoC / Provider / GetX / Redux • REST API & WebSocket Integration • Production Release & App Deployment • Data Structures & Algorithms • CI/CD & Version Control (Git, GitHub Actions) • Unit & Integration Testing • AI-Assisted Development & Prompt Engineering • Startup Mindset — Fast Execution & Ownership

WORK EXPERIENCE

Software Engineer | Mitti Labs

Jun 2026 – Present

- Working as a Software Engineer building and shipping production features across mobile applications.
- Using AI-assisted development tools (Claude Code, GitHub Copilot, Cursor AI) to accelerate implementation, debugging, and code review cycles.
- Collaborating with cross-functional product and engineering teams in an Agile environment to plan, build, and ship production releases.

Software Engineer | Freelance / Client Projects

Mar 2026 – Jun 2026

- Delivered independent client engagements end-to-end — requirement scoping, architecture, development, and production release — using React Native.
- Applied AI-assisted development workflows to speed up debugging and feature delivery for client projects under tight timelines.

Software Engineer | Milople Technologies

Aug 2024 – Mar 2026

Owned full SDLC — requirement gathering through architecture, development, testing, and Play Store / App Store release — across 5+ production apps.

- Architected and delivered 5+ Flutter apps end-to-end from requirements, cutting average delivery time by 20% through reusable component design.
- Built scalable, testable app architectures (BLoC, Provider, GetX) with 80%+ test coverage, cutting post-release bugs by 40% — zero critical post-launch failures.
- Integrated AI tools (GitHub Copilot, Claude, ChatGPT, Cursor AI) into daily workflow, cutting debugging time by 30% and boosting delivery speed.
- Optimized app performance (25% faster launch, sustained 60fps) and owned production-release lifecycle end-to-end — signing, provisioning, ASO, and store submissions.

Flutter Mobile App Developer | Softwingz Infotech

Jun 2024 – Aug 2024

- Developed and shipped Flutter features for 2+ client projects using Provider state management, covering UI/UX implementation and full API integration.
- Integrated REST APIs and Firebase services (Auth, Firestore, FCM), enabling real-time data sync and push notifications for 500+ active users.
- Adopted AI coding assistants to accelerate development; contributed in code reviews and integrated new pub.dev packages in agile sprint cycles.

KEY ACHIEVEMENTS

- Built TheBidNow's real-time WebSocket bidding engine supporting concurrent live auctions across 4 sports with sub-200ms response time.

- Shipped 5+ production apps live on Play Store and App Store — zero critical post-launch failures across all releases.
- Achieved 80%+ unit test coverage on critical modules, cutting post-release bug rate by 40%.
- Graduated B.Tech Information Technology with 8.66/10 CGPA while actively delivering freelance Flutter projects in parallel.

PROJECTS — LIVE ON PLAY STORE & APP STORE

Collect — Farmer & Carbon Tracking App — *React Native (Mitti Labs)*

- Core app connecting 1,000+ registered farmers to a carbon-monitoring and sustainability tracking workflow; developed and own core features end-to-end.
- Debugged and resolved ANR (App Not Responding) issues via Sentry/Crashlytics, improving stability on low-end devices.

TheBidNow — Live Auction App — *Flutter, Firebase (FCM), WebSocket, MySQL, BLoC*

- Real-time sports auction platform with live bidding, OTP auth, and predictable state across 4 concurrent auctions; sub-200ms WebSocket response time.

Amulya Mica Visualizer — *Flutter, Firebase, Provider*

- AR-style product visualization app reducing purchase-stage drop-off through interactive preview at 60fps.

Satvvaahar & SPJYM — *Flutter, Firebase (FCM), MySQL/PHP, GetX / BLoC*

- Food-ordering and community-events apps with real-time push notifications and profile/order state management.

Magento Mobile Application — *Flutter, Firebase (FCM), Magento REST API, Provider*

- E-commerce app with product browsing, cart, and order tracking; integration-tested checkout flow.

NoteNest — Flutter Notes App — *Flutter, Provider, Hive (Personal project — GitHub)*

- Offline-first notes app demonstrating clean architecture and local storage.

TECHNICAL SKILLS

Languages	Dart, JavaScript, TypeScript, HTML, CSS
Frameworks	Flutter SDK, React Native, Cross-platform (Android, iOS, Web, Desktop)
State management	BLoC, Provider, GetX, Riverpod, Redux
Production release	Play Console & App Store Connect submissions, signing/provisioning, TestFlight, ASO, staged rollouts
Testing	Unit Testing, Integration Testing, Widget Testing (flutter_test), Jest
Backend & database	Firebase (Auth, Firestore, Storage, FCM), REST API, WebSocket, PHP, MySQL
Engineering fundamentals	Data Structures & Algorithms, Clean Architecture, System Design basics, Code Review
DevOps & tools	Android Studio, Xcode, Firebase Console, GitHub Actions (CI/CD), Git, GitHub
AI tools	GitHub Copilot, Claude Code, ChatGPT, Cursor AI, Grok, DeepSeek — Prompt Engineering
Other	pub.dev / npm ecosystem, Performance Optimization, Agile/Scrum, UI/UX Principles

CERTIFICATIONS & RECOGNITION

- Google Play Store — Published Developer (5+ live apps across Android & iOS)
- Apple App Store — Published Developer (5+ apps live on App Store)
- AI-Assisted Development Practitioner — GitHub Copilot, Claude, ChatGPT, Cursor AI for production-grade development

EDUCATION

Bachelor of Information Technology2022 – 2025

Gyanmanjari Institute of Technology | CGPA: 8.66 / 10.0

Diploma in Information Technology2019 – 2022

SIR Bhavsinhji Polytechnic Institute | CGPA: 8.44 / 10.0

SOFT SKILLS & LANGUAGES

Strong Communication • Prioritization & Time Management • Adaptability • Problem Solving • Agile Mindset | English (Professional), Hindi (Fluent), Gujarati (Native)
